

## A B S T R A C T

A RELAY ANTENNA MAST FOR A CELLULAR RADIO TELE-  
COMMUNICATIONS SYSTEM

5

A relay antenna mast for a cellular radio telecommunications system, the mast being characterized in that it comprises:

- a mast stand (1);
- 10 • at least one arm (3) pivotally mounted on said mast stand (1) and carrying at least one antenna (5); and
- means for locking said arm in a position in which the antenna(s) is/are in a high position;

said arm (3) being suitable, when said locking means are disengaged, for being tilted about its pivot axis (4) to a position in which at least one antenna is at a height enabling it to be worked on by an operative at the foot of the mast.
